PUBLIC HEALTH OFFICERS OF THE COUNCIL

Medical Officer of Health

S.A. O'HAGAN, M.B., B.S., D.P.H.

Public Health Inspector

D.A. NORMAN, M.A.P.H.I.

The Highways, Sewerage and Public Health Committees deal with the majority of Public Health Matters although a separate Parks and Playing Fields Committee deal with swimming baths.

All members of the Council sit on all Committees.

To The Chairman and Members of
The Urban District Council of Woodhall Spa.

Mr. Chairman, Mrs. Farmery and Gentlemen,

I have the honour to present my annual report
for 1964.

The changes that come to a small urban district are either very few and dramatic - as perhaps may be the eventual outcome of the Local Government Review or stealthy and almost un-noticed as the trimming of branches from trees obscuring the street lamps.

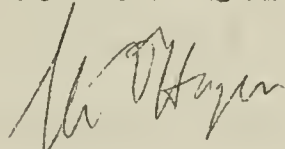

This year neither type of change was in evidence, although the latter was a continuous process. The population tends to vary as the status of the local R.A.F. establishments varies, but the recent building of a substantial number of Married Quarters is likely to reduce the future effect on Woodhall Spa.

The outbreak of typhoid fever in Aberdeen must have caused every Medical Officer of Health to ask himself "Could it happen here?". The answer is inevitably - Yes! There is always a risk that such an outbreak could happen anywhere in the country if the accepted safeguards are not enough. They rank in probability with aircraft disasters - you don't hear of the millions of uneventful flights or packages of food. In retrospect, the assistant who put the sliced meats in an un-refrigerated display where the germs could grow gave the Health Department several days notice of what might come, and possibly saved many additional cases.

There is long term evidence of increasing human activity in Woodhall. Births rose from an annual mean of 23.6 in the years 1949 - 55 to 35.8 in the years 1959 - 65. Deaths in the same periods increased from a mean of 32.5 per annum to 46.5. In both instances it may be regarded as a late consequence of the war and the slow rehabilitation of Woodhall Spa as a community. These figures make an interesting contrast with a pre-war figure (1938) of 10 Births and 35 Deaths. It appears that the years have not treated Woodhall Spa unkindly and that the efforts made to improve the amenities are attracting appreciably more residents (2280 in 1964 compared with 1451 in 1938).

Once again I would wish to thank the members and officers for their courtesy and help during the year.

I remain,
Your obedient Servant,

A handwritten signature in dark ink, appearing to read "W. H. H. H.", is written over the typed name.

Medical Officer of Health.

INFECTIOUS DISEASES

Notifications of infectious disease have been notably few.

Pulmonary Tuberculosis	2
All others	Nil.

Last year I commented on the very low figure for primary smallpox vaccination and the explanation of it.

As expected, the current figure shows an increase but it will be a further year before the figures return to normal.

In respect of the other four diseases against which active immunization is advocated, the figures related to births are very satisfactory.

Table of Immunization and births in previous years

The National Health Service

The only problem in connection with the National Health Service is the national shortage of beds for elderly chronic sick. Here we must face a painful decision - are the resources available to be used for the relatively young with a good expectation of life or for a fewer number of elderly for whom only a few more years remain. In every case, the decision is a personal one, involving many factors other than the age of the patient and nature of the complaint, but it is basically true that the function of the hospitals is basically curative. The accommodation of the aged is the mutual responsibility of County and County District Councils, whilst for those who live, without hope of recovering, there is a crying need for constant support for such organisations as the Cheshire Homes.

There is a generation in need who, after the first world War and the years that followed, felt unable to rear more than one child.

Now those children, often with two sets of elderly and ailing "grand-parents" have a burden that is indeed hard to meet.

Water Supply

The children's teeth continue to decay unnecessarily whilst legal battles are fought over the question of fluoride correction. Now that the legal objection is removed by the collapse of the case against Watford Corporation it is to be hoped there will be little further delay in adding fluoride where-ever it is necessary. There can be few areas in the country where it is more necessary than Woodhall Spa.

Sewerage and Refuse Disposal

There were no major problems in these services although it is inevitable that in any small authority, spare men and equipment are not readily available as in a larger one.

The Park, Cafe and Swimming Pool

I group these three undertakings together since they are an increasing item in the Council's activities. Together with the sites available to the Camping Club and Caravan Club they form a very definite attraction to visitors and by their state of care, visitors will incline to judge Woodhall Spa.

Acts of vandalism do occur, as elsewhere, but are possibly fewer than in other local places.
